

Installation Instructions

Model PFT Series

Portable FireFighters' Telephones

INTRODUCTION

The PFT Series FireFighters' Telephones include models PFT and PFT-P, as shown in Figure 1. Both models have a jack at the end of the phone that plugs into either an FJ-303(SS) or FJ-304(SS) plate. Model PFT-P has a "push-to-talk" button.

The PFT Series is compatible only with the FireFinder-XLS/Designo Fire Safety Modular/Cerberus PRO Modular System.

Cyber security disclaimer

Siemens products and solutions provide security functions to ensure the secure operation of building comfort, fire safety, security management and physical security systems. The security functions on these products and solutions are important components of a comprehensive security concept.

It is, however, necessary to implement and maintain a comprehensive, state-of-the-art security concept that is customized to individual security needs. Such a security concept may result in additional site-specific preventive action to ensure that the building comfort, fire safety, security management or physical security system for your site are operated in a secure manner. These measures may include, but are not limited to, separating networks, physically protecting system components, user awareness programs, defense in depth, etc.

For additional information on building technology security and our offerings, contact your Siemens sales or project department. We strongly recommend customers to follow our security advisories, which provide information on the latest security threats, patches and other mitigation measures.
